## ABOUT MAKKA PLASTIC

'**Makka Plastic**' is one of the leading distributors of Industrial Plastic and Packaging Products in the UAE and GCC. As an well known player in the region since 2015, we appreciate the support from our everlasting list of clientele to maintain Makka Plastic as competitive player in the industry, Resulting Makka plastic as a diversified company which stands on top against other plastic industries in the market. Our mode of operation and related supplies includes Airline companies, Food and Beverage industries, Retail Agriculture & Petrochemicals units, Warehousing and Logistics, Construction industries, Automotive, Pharmaceuticals etc.

'Makka Plastic' has a team of dedicated specialists who can manage in order to identify the best suitable solution for your available space. we are always keen in providing our customers high quality products at competitive price, prompt delivery, and excellent services.

# FIBC Bags Types

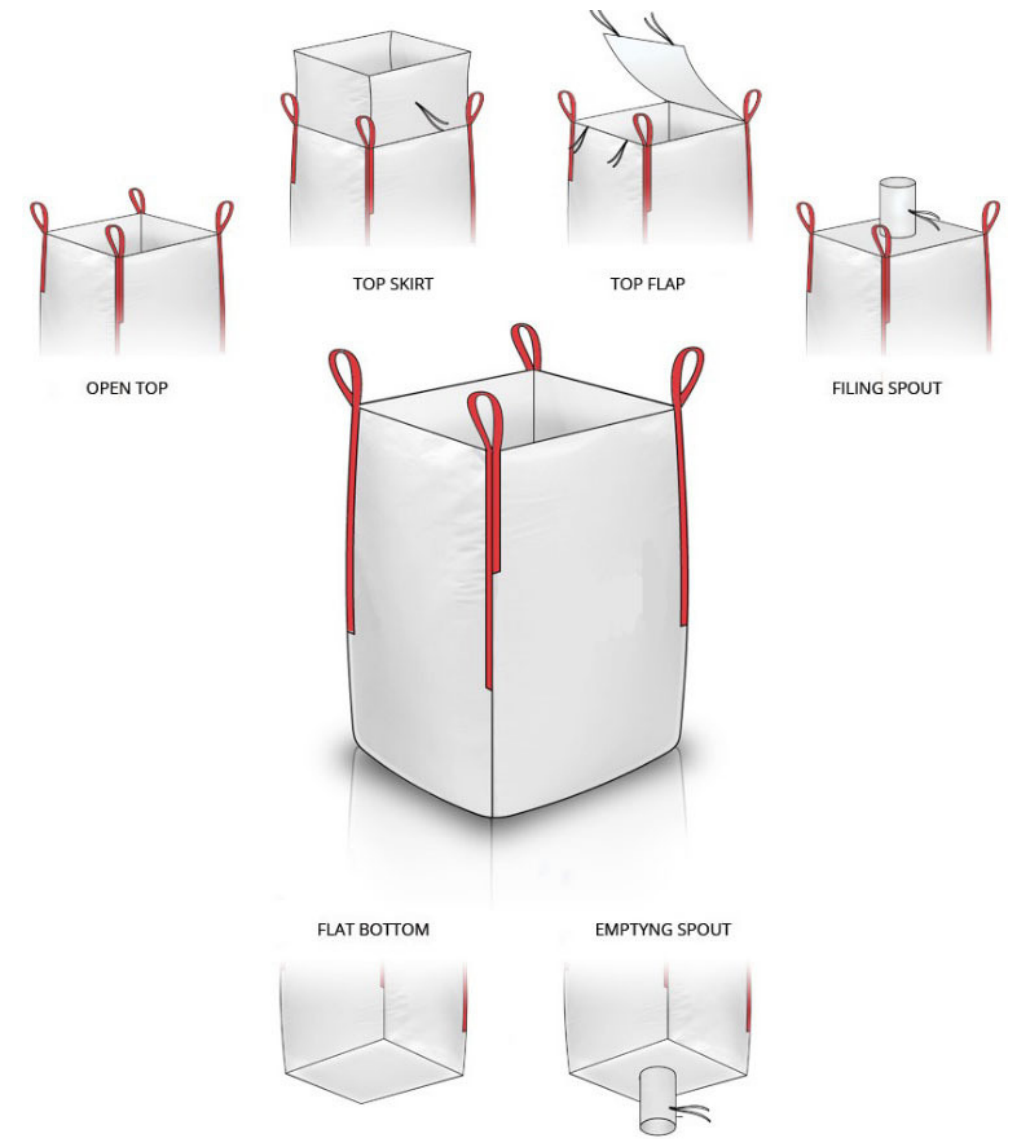

## FIBC/ JUMBO BAGS

Flexible Intermediate Bulk Containers (FIBC) are widely used for storage, transportation and handling of powder, flake or granular materials. Typically they are constructed from woven polypropylene (PP) fabric in the form of cubic bags. The fabric used may be a single layer, with extra loose liner, or laminated. The UV treated PP is a good electrical insulator.

FIBCs, also called big bags, bulk bags or jumbo bags, FIBCs have a very low packaging weight and are safe to use and available in various different forms. In 90 percent of cases, we custom make the FIBC for our customers. In doing so, we take into account the filling and discharging conditions, the hygroscopic properties and the density of the product being packaged.

## DIFFERENT TYPES OF JUMBO BAGS WE HAVE TO OFFER:

- Circular Type with Cross Corner / Corner Loops U-panel / 4
- Panel Bags
- Baffle Bag
- Conical Top / Bottom Bag
- 4 loop bag
- UN bags
- Antistatic conductive bags

## FEATURES OF OUR DESIGNED JUMBO BAGS:

- Safe Working Load (SWL): 500 kilograms. to 2500 kilograms
- Size: As per customer requirements
- Safety Factor: 5:1 or 6:1 as per customer requirements
- Material: PP UV stabilized
- PE Liner: 40-100 Micron thickness
- Quality: All our bags are made as per industry standard

# PP ROPES

PP Ropes, well known for their strength and flexibility amongst their users. Some benefits of PP Ropes are Rot-proof material, High strength, Lighter than water, and Hard-wearing construction whilst being recyclable grade 4.

## **USES OF PP ROPES:**

- Agricultural.
- Fishing Industry.
- Construction.
- Utilitarian purposes.
- Water sports.

# PE TARPAULINS

PE Tarpaulins are made of High Quality PE Fabric. Water proof, stabilized against ultraviolet rays & excess heat for long outdoor exposure.

- **Type :** Reinforced PE Tarpaulin.
- **Material:** Made with HDPE fabric with both sides LDPE Lamination.
- **Weave :** up to 60x60 ft.
- **Material Weight :** starting from 100 gsm - 480 gsm.
- **Treatment :** Stabilized against ultraviolet rays & excess heat for long outdoor exposure. Max 5% loss on original tensile strength under ISO1421 after 1500 hours UV Under ASTM 653/94.
- **Tensile Strength:** Min 600 N both directions of warp and weft (BS 2576, 50mm grab test or equivalent).
- **Tear Strength :** Min 100 N both directions (BS 4303 Wing Tear or equivalent).
- **Flammability :** Above 200 C Flash.
- **Point Grommets :** Provided with strong aluminum eyelets on 4 sides of the single sheet at 100 cms (+/-5cm) intervals center to center and reinforced with nylon ropes in them.

# PP WOVEN SACKS

We offer our customers the best quality products. Our offer comprises of various types of bags and sacks. We make polypropylene woven bags and sacks according to our customer's specifications, such as dimensions and weights. PP Woven bags are the traditional bags in packaging industry due to their wide variety of usage, flexibility and strength.

## WHY CHOSE WOVEN SACKS?

- Budget friendly.
- Flexible and high strength, persistent durability.
- Can be printed on both sides.
- Water and dust proof design due to inside PE liners or laminated on the outside.
- Filled materials are protected from outside humidity.
- Twisted weave and anti-skid print to prevent slipping.
- Fully recyclable hence, eco-friendly.

## USES OF WOVEN SACKS:

- Storage of Chemicals, fertilizers, cement, urea, minerals, resin, polymers, and rubber.
- Storage of Flour, grain, seeds, spices, pulses, dates, agro products, fish meal, and cattle feed.
- Storage of Sugar, and salt
- Storage of Sand, metal parts, and concrete elements.
- Storage of Fruits, vegetables
- Storage of Mails, letters, and documents.

# PE SHEETS

Polyethylene sheet is commonly used as a damp-proof membrane with over-site concrete for all but severe conditions of dampness. It is recommended that the sheet should be at least 1000 gauge. The sheet is generally supplied in rolls 4 m wide by 25 m long with a weight of 1 kilo / meter. But, we will take custom orders and can manufacture polythenes as per customer length, width and weight. When used under concrete over site the sheet should be laid on a blinding layer of sand or compacted fuel ash spread over the hardcore. The sheets are spread over the blinding and lapped 150 mm at joints and continued across surrounding walls, under the dpc for the thickness of the wall. Where site conditions are reasonably dry and clean, the overlap joints between the sheets are sealed with mastic or mastic tape between the overlapping sheets and the joint completed with a polythenes jointing tape.
